EDUCATION

PhD Candidate, HCI

University of Siegen, Germany

2021 – Present

M.Sc. Human-Computer Interaction

University of Siegen, Germany

2016 – 2021

M.Sc. Mechatronics Engineering

Azad University of Qazvin, Iran

2011 – 2014

B.Sc. Computer Science

Payame-Noor University, Iran

2005 – 2010

LANGUAGES

English Fluent (C2)

German B2

Persian Native

CORE SKILLS

PROJECT & PRODUCT MANAGEMENT

Agile (Scrum, Kanban) · Roadmapping · Backlog Ownership · User Stories · KPIs · Change Management · Stakeholder Alignment · Sprint Planning · OKRs

UX RESEARCH

Interviews · Usability Testing · A/B Testing · Co-design · Mixed Methods · MAXQDA

UX DESIGN

Wireframing & Prototyping (Figma) · UI Design (Adobe CC) · Onboarding Flows · Accessibility

AI & DIGITAL

Prompt Engineering · Gemini / GPT · Midjourney · AI-supported Product Design · Privacy-aware UX · Responsible AI · Privacy-by-Design · Human-Centered AI · AI-assisted Product Design · Prompt Engineering

TOOLS

Jira · Figma · Miro · MAXQDA · Adobe CC · Lovable · GAMMA · UNITY

TECHNICAL

Python · HTML/CSS · C++ · MATLAB · Linux

PROFILE

Product Manager with a background in Human-Computer Interaction and Mechatronics Engineering. Experienced in leading product discovery and digital transformation initiatives across AI-enabled platforms, cybersecurity, and digital learning systems. Skilled in defining product vision, managing roadmaps and backlogs, and aligning stakeholders across research, engineering, and business functions.

Combines user-centered research, experimentation, and data-driven decision-making to transform complex user needs into scalable product solutions. Passionate about building trustworthy AI products that balance user value, transparency, and measurable business impact.

PROFESSIONAL EXPERIENCE

Digital Technologie Manager & UX Lead

Oct 2021 – Present

University of Siegen — Research & Digital Platforms Division, Germany

Initiated and steered multiple digital transformation projects within a cross-institutional matrix organization. Acting as the interface between business units, IT, and external vendors across three BMFTR-funded digital platform programs.

CrossComITS — National Cybersecurity & Digital Learning Platform

Technical Product Manager & UX Researcher | BMFTR-funded | May 2023 – Dec 2025

Led product strategy and roadmap development for a participatory cybersecurity learning platform (Train-the-Trainer model, OER), translating consortium goals into scalable product capabilities and measurable KPIs.

- Owned end-to-end product lifecycle (discovery → delivery → evaluation); defined vision, roadmap, and KPIs aligned with stakeholder and business goals
- Translated user and market needs into user stories and prioritized backlog; collaborated with engineering and stakeholders to ensure delivery alignment
- Drove product decisions through A/B testing, experimentation, and data-driven analysis, improving discovery and navigation flows

Delivered measurable impact:

- +25% user engagement
- +40% task success rate

NEBULA — Human-Centered AI for Misinformation Detection

AI Product Manager & UX Researcher | BMFTR-funded | May 2023 – Dec 2025

BMFTR-funded project designing AI-supported digital tools, translating user research into product features improving usability and trust.

- Conducted product discovery with vulnerable user groups; defined requirements for AI-supported misinformation detection experiences
- Balanced automation vs. user control; shaped AI-enabled browser, mobile, and web solutions through participatory design and responsible AI principle
- Facilitated cross-functional collaboration between product, UX, and engineering

DCitizen — EU-Funded Digital Citizenship Initiative

UX Researcher | May 2024 – Aug 2025

- Identified user needs and behavioral patterns through workshops
- Translated insights into product opportunities and features

PUBLICATIONS

ACM PDC 2026 — Mediating Digital Security (accepted)

OzCHI 2023 — Prototyping & Evaluating Bo App

IJISA — Mobile Robot Path Planning (RRT*)

Co-author — CrossComITS Book

PhD Research — Participatory digital design for migrant mental wellbeing

Surveillance Beyond Borders — Privacy-Aware Platform

Product Manager & Designer | Apr 2024 – Jul 2025

- Led discovery research with 22 migrants experiencing transnational digital surveillance, identifying critical user needs related to trust, privacy, and digital safety.
- Developed the “Ecology of Digital Survival” framework and transformed research findings into user journeys, product requirements, and privacy-aware design concepts.
- Defined strategic product opportunities and roadmap recommendations for trust & safety features, privacy controls, and community protection mechanisms, informing future platform development.

eVITA Virtual Coach — EU-Funded Cognitive Training Platform

UX Researcher & Designer | Oct 2021 – May 2023

- Managed backlog and contributed to delivery of an AI-driven cognitive training platform
- Defined and optimized core user flows and onboarding experience
- Translated research insights into product improvements and feature prioritization decisions
- Conducted usability testing to inform iterative product development cycles
- Delivered measurable impact:
 - ▶ -28% user errors
 - ▶ -40% requirement revision rounds (via 8 co-design sessions)

Digital Integration Specialist (Internship)

Jan – Aug 2021

Operatis Startup, Germany

- Integrated data pipelines and cybersecurity workflows between two platforms, reducing manual processing time by 20%
- Managed data transfer on Windows Server generating JSON knowledge graph structure
- Drove tool evaluation for 3 candidate platforms, delivering a structured evaluation and recommendation framework

Lecturer & Digital Competency Trainer — Computer Science

Oct 2014 – Apr 2016

Azad University of Tehran, Iran

- Built digital competency in 200+ students per year through structured learning materials and hands-on workshops — directly paralleling the educational outreach mandate in this role.
