

ROODABEH SEIF

AI-NATIVE PRODUCT MANAGER | UX RESEARCH | M.Sc. HUMAN-COMPUTER INTERACTION

Responsible AI · Research to Requirements · 0 to 1 Product Discovery

Berlin, Germany | +49 1590 6121262 | roodabeh.seif@gmail.com
linkedin.com/in/roodabeh-seif | roodabehseif.com

PROFILE

AI-native Product Manager with a UX research background and an M.Sc. in Human-Computer Interaction, with 4+ years in EU, EU-Japan and German federally funded digital product projects. Owns the full product path from user research and problem framing to requirements, prioritisation, implementation and validation, with clear responsible AI boundaries. Coordinated a six-partner consortium, led a student assistant team, and builds 0 to 1 products end to end with AI-assisted tools. 5 publications.

CORE COMPETENCIES

Product: Product Strategy · Discovery · MVP Scoping · PRD-style Requirements · User Stories & Acceptance Criteria · Roadmapping · Backlog Prioritisation (Kanban; GitHub) · Agile / Scrum · Decision Logs · Stakeholder Management

AI Product: GenAI / LLM Use-case Scoping · AI Evals · Guardrails · Human-in-the-Loop · Deterministic vs. GenAI Architecture · Prompt Evaluation · Privacy by Design · Explainability

Research & Design: Interviews · Participatory Co-Design · Usability Testing · A/B Testing · Thematic Analysis · Trauma-informed Research · Personas · Journey Mapping · Prototyping

Tools & Technical: Jira · Confluence · Notion · Miro · Figma · Lovable · ChatGPT · GitHub · MAXQDA · Adobe CC · Python · Unity · HTML / CSS · MATLAB · Linux · Docker

PROFESSIONAL EXPERIENCE

PhD Candidate | Human-Computer Interaction
2026 - present

University of Siegen | Siegen, Germany

- Doctoral research on participatory digital design for migrant mental wellbeing.

Research Associate (Wissenschaftliche Mitarbeiterin) | Product, UX Research & Project Coordination
10/2021 - 12/2025

University of Siegen | Information Systems and New Media | Siegen, Germany

- **CrossComITS (BMBF/BMFTR, 2023 - 2025), project coordinator:** Coordinated a six-partner consortium and led the University of Siegen team and the partner team in Scrum-based iterations; led the student assistant team; maintained roadmap and decision logs and owned backlog prioritisation on a Kanban board in GitHub.
- Led product discovery with 3 user groups (older adults, migrants and refugees, youth) and translated interviews, fieldwork, workshops and usability tests into personas, journey maps and PRD-style requirements with user stories and acceptance criteria for an OER learning platform.
- Delivered 3 learning products: a cybersecurity board game, metaphor flashcards and an OER learning platform. An A/B test of flashcard formats decided the product format: metaphor plus a short explanation.
- **NEBULA (BMBF, 2023 - 2025), UX researcher:** Researched trust in AI with vulnerable groups and turned the findings into responsible AI requirements for a misinformation detection tool (explainable, contestable, multilingual, human-controlled), which fed the consortium backlog in Jira. Built an own concept prototype.
- **eVITA (EU-Japan, 2021 - 2023), UX researcher and designer:** Improved the ABC App in Unity and designed the Bo App end to end for the NeU fNIRS brain activity sensor, through interviews, real-time co-design and think-aloud tests with 7 older adults in 12 sessions and 4 design rounds.
- Result: independent sensor setup rose from 25% to 100% and 80% of high-priority usability issues were resolved. Multilingual design for German, French, Italian and Japanese users. Published at OzCHI 2024.
- **Surveillance Beyond Borders (2024 - 2025), lead researcher:** Led trauma-informed research with 37 interviews on digital safety under transnational repression; derived five dynamics, a framework and a working prototype with five safety concepts.
- **Mentoring:** Mentored students in their master theses and study projects; co-authored 4 publications (ACM, Springer, OzCHI) and contributed to grant proposals.

Business & Data Analyst Intern | Cybersecurity
12/2020 - 07/2021

Operatis Business Technology Consulting | Germany

- Turned business processes and operational needs into structured requirements and workflows; supported evaluation, testing and rollout of IT and business software.
- Prepared and validated data for integration and migration (knowledge graph, JSON-to-RDF, Linux, Bash, Docker) and coordinated between clients, consultants and technical stakeholders.

Lecturer & Digital Competency Trainer | Computer Science
10/2015 - 12/2017

Islamic Azad University | Tehran West and Karaj branches, Iran

- Taught undergraduate courses in data structures, computer networks, Photoshop and technical English, and ran digital competency workshops for 200+ students per year.

SELECTED PRODUCT PROJECTS

Retune, B2C Wellbeing App | 0 to 1

- Habit and routine app for people living through crisis, illness or migration: one small routine as healthy emotional support and a sense of control.
- Owned it from research to a functional Persian (right-to-left) MVP built with Lovable.
- Validated with a 25-person survey, 5 interviews, 6 usability tests and a 4-week pilot with 5 users: 86% onboarding success, 78% correct understanding of privacy settings.

Ghesse Khaneh, Interactive Storytelling | 0 to 1 Product: Platform that supports facilitators before, during and after storytelling sessions with children. Research, concept, information architecture and a bilingual (Persian / English) web-app prototype; AI assistant as a human-in-the-loop concept.

DARA, Workplace Wellbeing | 0 to 1 Product | 2026: Own idea, owned end to end. Functional browser demo built in one day: employee view and a manager view based only on aggregated, anonymised team patterns. Concept stage, not yet user-tested.

EDUCATION

M.Sc. Human-Computer Interaction **2019 - 2022**
University of Siegen, Germany | Thesis: How older adults use measures of brain activity in real life

M.Sc. Mechatronics Engineering **2011 - 2014**
Islamic Azad University, Qazvin, Iran | Research: mobile robot path planning with RRT* (IJISA 2015)

B.Sc. Computer Science **2005 - 2010**
Payame Noor University, Iran

CERTIFICATES & TRAINING

AI Consulting & Integration Bootcamp, Ironhack (10/2026 - 12/2026, ongoing) · Microsoft AI Product Manager Professional Certificate, Coursera (in progress) · Enterprise Product Management Fundamentals · Foundations of User Experience (UX) Design · DCitizens Summer School (EU Horizon), Lisbon, 2024

PUBLICATIONS

- Mediating Digital Security: Participatory Learning with Older Adults in Smartphone Café Sessions. ACM PDC 2026. Second author.
- Building Bridges, Not Barriers. Book chapter, Springer VS, 2026. First author.
- User-Centred AI for Combating Misinformation with Vulnerable Groups. Book chapter, Springer VS, 2026. Second author.
- Prototyping and Evaluating Bo App: A Brain Measurement Device as a Feedback Tool for Cognitive Training. OzCHI 2024, ACM.
- Mobile Robot Path Planning by RRT* in Dynamic Environments. IJISA, 2015. First author.
